GreenStreet Solutions Welcomes New Members to the Team

New Greater Cincinnati & Dayton office grows to help homeowners save green

Monroe, Ohio (August 8, 2011) – GreenStreet Solutions, a Cleveland-based company, introduces a new concept in home energy audits to educate homeowners and ensure efficiency and savings. The comprehensive “Total Home Performance Review” is conducted by a team of certified professionals who evaluate the entire home as an integrated system, search for potential problems and recommend effective solutions, as well as offer the homeowner the service of implementing any or all of the recommended improvements.

The GreenStreet Solutions' team is local. Each auditor is experienced in helping homeowners make the necessary improvements to prevent further energy waste, save money on utilities, and increase the comfort and safety of their homes, while making a positive impact on our environment. GreenStreet Solutions is proud to announce William E. Bailey as the manager of the Monroe office, located at 876 Lebanon Street, and Keith H. Poole and David L. Lowe as certified Total Home Performance Review Auditors. Bailey, a native of Dayton says, “I am excited to begin our work in the Greater Cincinnati and Miami Valley areas. We look forward to getting involved in our community and becoming contributing members.”

Each member of the GreenStreet Solutions team has a background in the energy industry as well as specific training in the detection, resolution and management of energy efficiency and environmental issues. GreenStreet Auditors are fully trained in home energy technology through the Building Performance Institute, an organization that is globally recognized for training and quality assurance programs in residential energy efficiency. To ensure security, each individual is a bonded, insured, full-time employee of GreenStreet Solutions. Future positions may become available as the demand for Total Home Performance Reviews increase.

The benefit of having GreenStreet coordinate recommendations is that the company will send auditors to the home for a second and final test to ensure that the improvements are completed as described and that they delivered the promised efficiencies per the company's guidelines.

GreenStreet Solutions' Total Home Performance Reviews are \$250. The Monroe office will service Cincinnati, Dayton, and Northern Kentucky residents. Please call 513-465-9039 for any questions or to service a Total Home Performance Review.

About GreenStreet Solutions:

GreenStreet Solutions, a one-stop shop, provides Total Home Performance Reviews to identify problem areas in your home and to outline recommended solutions to prevent further energy waste. Suggested retro fit services can improve your home energy safety, comfort, and efficiency. GreenStreet Solutions is based in Cleveland and is backed by parent company,

Vectren Source—a supplier of natural gas to customers throughout Ohio and the Midwest. It is a division of Vectren Corporation, a publicly traded energy company [NYSE: VVC] with more than \$3.4 billion in assets and over one million customers. To learn more, visit www.greenstreethome.us.
